OUR VISION

ROADMAP

LAST NOTE

ABOUT

Miyazaki Inu is the newest and hottest community oriented token on the ETH network. With an army of supporters, marketers, developers, and community managers - Miyazaki Inu has exploded onto the scene like few others do.

With an extensive marketing campaign comprised of numerous different promoters and influencers, our outreach for Miyazaki Inu has spread globally, creating an incredibly diverse community of investors and supporters.

OUR LOOK

One of our most important goals with this token is to have our own unique identity. Having an identifiable brand that is individual to us not only gives our army an icon to rally behind, but also creates a unique foundation for us to stand upon as we continuously develop our horizons. We strongly believe in the importance of a token's exclusive identity, and that is why we upgraded to this.

We hope you are as excited about our new concept as our team is!

DEVELOPMENT

Miyazaki Inu (\$MIYAZAKI) is a deflationary token on the Ethereum network with taxes in place to allow for sustainability and rewards for our investors.

This token was created with innovative Anti-Bot and Anti-Sniper protection that allowed us to protect our holders from others getting an unfair advantage. With the initial transaction and wallet size limits at launch, we prevented a large portion of the supply of tokens from being handled by a handful of people. This distribution will help us in the future from harmful whale manipulation.

OUR VISION

Here at Miyazaki Inu we are always looking towards the future.

We strive to stay ahead of the game when it comes to what we produce and what we want this token to be. With the recent technological advancements and mass adoption of NFTs, we want our ecosystem and utility applications to be tailored towards them. We believe that they have the potential to make a massive impact on our daily life in the long run, and we want to be a part of it when it does.

OUR ECOSYSTEM

Miyazaki Swap

Our initial project for the Miyazaki Ecosystem is a swap that allows for the buying, selling, exchanging, staking, and farming of a variety of different Anime Crypto tokens out there.

Holders of \$Miyazaki will be able to earn more by staking it in the pools that we set up. All tokens added to the exchange will go through an extensive audit process to ensure that they are safe for our investors.

Miyazaki NFT Maker

Miyazaki Inu will have its own launchpad for creators to make their own NFT collection, P2E game, or other projects with the assistance and resources Miyazaki Inu can offer.

We intend to help different creators get their ideas off the ground and provide whatever help is necessary in doing so, because as a whole that improves the Crypto and NFT spaces we are in.

Miyazaki Game Hub

With so many P2E games in production with the variety of different tokens out there, one problem presents itself - an easy way to access all of the P2E games out there, in one area.

What we intend to create is a gaming hub for all these different NFT / P2E games. A place where people can access these games, compete with one another, or trade the game based NFTs they have. In short, think Steam for NFT / P2E games.

THE MIYAZAKI INU ROADMAP

Now that we have completed a majority of our initial roadmap, it is important for it to grow as we do. Here is the newest version of our roadmap.

PHASE 1

2000 Holders
\$20M Market Cap

Youtuber Collaborations
Miyazaki Maker Beta

PHASE 3

10000 Holders
\$150M Market Cap
Top 10 CEX Listing
Metaverse Planning

NFT Integration
Further Utility Planning
Onboarding Game Devs
Miyazaki Game Hub Beta

ONE LAST NOTE

It is truly incredible to see the immense support we have received for Miyazaki Inu. The recent changes to our brand, roadmap, and our plans for the future are our way of showing our loyal supporters and future investors that we are a project that is here to stay.

We plan on growing with you all. The ideas and concepts laid within the whitepaper are just what we thought of for where to take this token. Given that this is ultimately a community run project, it is you all who truly decide the direction we go. Crypto changes fast, and our main motto is to be ahead of the curve, not behind it. To that end, we will change our goals as needed in order to make sure this token is up to date with the future of Crypto.

Thank you all once again for everything!
